

# Acro Aircraft Seating brings INNOVARES seat to AIX 2024

Acro Aircraft Seating's INNOVARES Premium Economy seat

[Acro Aircraft seating](#) has introduced INNOVARES, a new Premium Economy seat and the latest addition to the Acro product family. The seat has been shortlisted for the [Aircraft Interiors Expo \(AIX\) 2024 Crystal Cabin Awards](#).

“Since its unveiling at AIX 2023, our talented engineering team have been working hard to further refine INNOVARES’ design in response to invaluable customer feedback,” said Catherine Perry, Senior Marketing Manager at Acro Aircraft Seating via LinkedIn. “With the positive improvements that have been implemented since then, Acro is confident that airlines will appreciate its generous recline, class-leading foot space and sleek, minimalist design.”

The INNOVARES seat’s footwell design prioritizes passenger comfort by maximizing the use of space in Premium Economy on widebody aircraft. It addresses the limitations caused by obstruction from seat frame legs, featuring a structural solution that provides a more spacious, car-style footwell for passengers.

Acro Aircraft Seating will be exhibiting at stand 5D10 at AIX 2024 and invites attendees to come see the INNOVARES seat firsthand.
